

Minimalist Parlor

Fitz Pullins designed this natural light-filled room for his husband and stepdaughter, who love to play chess. So how do they keep it tidy? "We have an acrylic trunk that stores all our games," he says.

Foosball Corner

The built-in sofa in this game room allows Foosball players to take a quick break between rounds, and for any visiting parties to comfortably enjoy a front row seat as the action unfolds.

Versatile Lounge

Monochromatic floor-to-ceiling shelves display decor and hold essentials in this game room designed by Nina Magon, while soft surfaces welcome everyone. "The parents use it for entertaining *and* for their young child to play in," she says.
